

Turn EHS Data Into **Actionable** Intelligence

Visualize compliance performance, measure operational risk, and guide strategic decisions — powered by real-time regulatory data.

Trusted by EHS and Operations Teams Around the World

The Challenge: **Disconnected Data Creates Compliance Blind Spots**

What You're Up Against

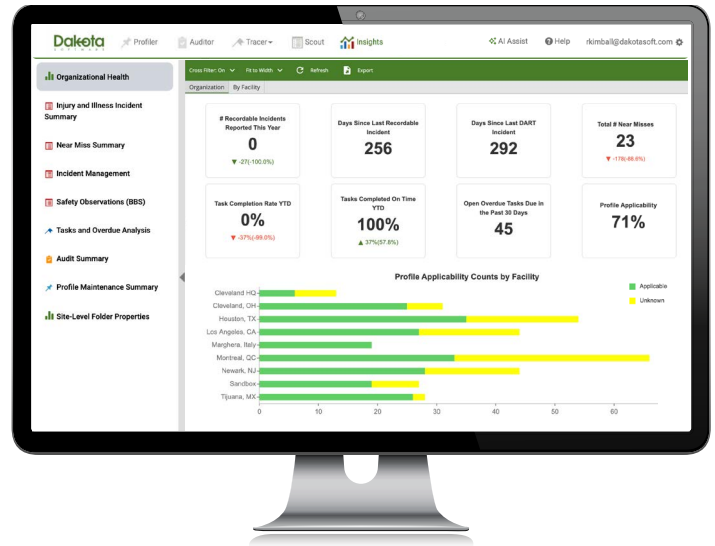

- ❗ Key metrics are trapped in siloed systems and outdated spreadsheets
- ❗ Leadership lacks clear visibility into EHS performance across the enterprise
- ❗ Traditional KPIs ignore regulatory context — making it hard to know where risk is building
- ❗ The financial impact of non-compliance is unknown until a Notice of Violation occurs

How Dakota Helps

- ✓ Prebuilt and configurable dashboards unify data from across your EHS program
- ✓ Prebuilt dashboards for safety KPIs, compliance activities, and regulatory readiness
- ✓ Filter by facility, region, and regulatory topic to surface trends and pinpoint areas of risk
- ✓ Penalty Risk dashboards surface potential financial exposure using real OSHA and EPA enforcement data

A Sharper Picture of EHS Performance and Risk

- 1 See Your Programs At a Glance**
Dashboards are automatically populated from ProActivity regulatory, audit, incident, and task data — no configuration required.
- 2 Explore Performance from Every Angle**
Filter by facility, region, business unit, or regulatory topic to surface trends, identify gaps, and understand performance across the enterprise.
- 3 Quantify Risk and Prioritize Action**
Dashboards connect regulatory, compliance, and safety performance insights — giving leaders a complete, actionable view of organizational risk.

Key Benefits of Dakota's EHS Analytics Solutions

Regulatory Readiness

Understand regulatory risk across sites with unique leading indicators powered by Dakota's regulatory database.

Standard Safety KPIs

TRIR, DART, near miss risk scores, and other established metrics provide a consistent view of safety performance.

Customizable Dashboards

Adjust to measure success against evolving corporate and site-specific targets.

Penalty Risk Insights

Cross-reference audit results to OSHA and EPA enforcement data to understand financial regulatory risks.

Leadership-ready Reporting

Schedule or export data files and images for presentations and agency submissions.

Fully Connected Ecosystem

Integrates with ProActivity for complete EHS compliance, safety, and risk visibility.

Who Uses Dakota's EHS Analytics Solutions

Corporate EHS Leaders

Gain visibility across all locations with real-time insights for smarter compliance and risk management.

EHS Compliance Managers

Monitor regulatory readiness, measure operational performance, and uncover compliance gaps.

Operations & Risk

Understand regulatory exposure and proactively safeguard operations.

Ready to see it in action?

"We used to spend a lot of time preparing and assembling various EHS reports. With Dakota, we save about a week of man hours every month."

- EHS Global Data Analyst, Idexx Laboratories
