

Every Action Item, Tracked to Closure

Unify, track, and close out EHS tasks—including Corrective and Preventive Actions (CAPA) and regulatory compliance tasks—on time, every time.

Trusted by EHS and Operations Teams Around the World

The Challenge: Disconnected Tasks, Inconsistent Results

What You're Up Against

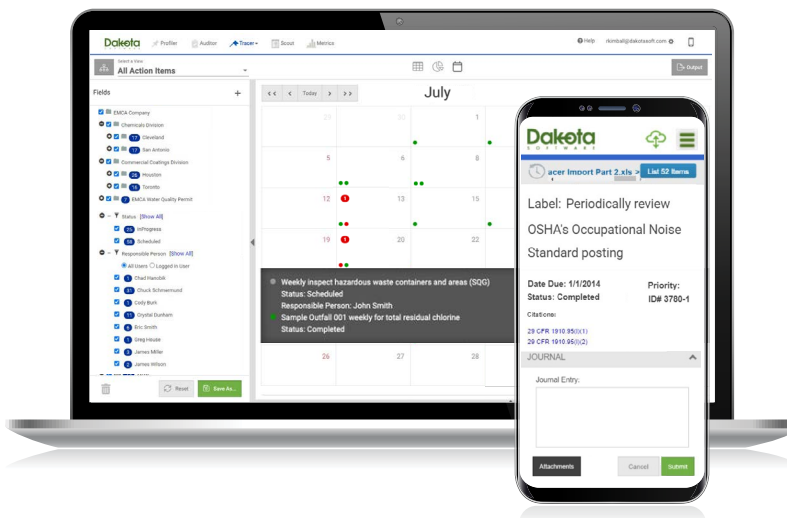

- ❗ Compliance tasks become stale with no connection to regulatory requirements
- ❗ Each site operates with different systems, priorities, and processes
- ❗ Action items lack source context and guidance needed for effective prioritization and execution
- ❗ Limited visibility and unclear ownership allow CAPAs and tasks to go unresolved

How Dakota Helps

- ✅ Tasks link to Dakota's regulatory database, ensuring they are current and relevant
- ✅ Centralizes compliance task and CAPA workflows across all facilities and teams
- ✅ Action items connect to regulations, audits, incidents, etc., providing context and clarity
- ✅ Dashboards provide real-time visibility into overdue items and team performance throughout the enterprise

A Smarter Path to Action and Accountability

- 1 Schedule and Assign Action Items**
Tasks are auto-generated from regulatory profiles or created from audits and events with scheduling and role-based assignment built in.
- 2 Track Progress and Drive Accountability**
Automated alerts, role-based access, and user activity logs keep every task moving and fully documented from assignment to closure.
- 3 Measure Performance and Identify Gaps**
Dashboards show completion rates by site, team, and regulatory topic, helping to avoid bottlenecks and drive continuous improvement.

Key Benefits of Dakota's Action Item Management Solutions

Centralized Task and CAPA Management

One platform for tracking every action item — across sites, teams, and workflows.

Built-in Regulatory Intelligence

Tasks linked to Dakota's regulatory database provide guidance and clarity.

Smart Automation

Compliance tasks are auto-generated from regulatory profiles with roles and ownership carried forward.

Documented Accountability

Time-stamped user logs support compliance from assignment to completion.

Enterprise-wide Visibility

Dashboards show completion rates, overdue items, and workloads across teams.

Unlimited User Model

Unrestricted access drives adoption and collaboration across EHS, operations, and quality functions.

Who Uses Dakota's Action Item Management Solutions

Corporate EHS Leaders

Gain visibility across all locations with real-time insights for smarter compliance and risk management.

Site EHS Managers

Keep compliance tasks and action items organized, assigned, and moving toward closure.

Quality and Operations

Manage CAPAs alongside regulatory obligations in a single, connected workflow.

Ready to see it in action?

"Being able to visualize all of our action items in one place is really important. The calendar gives us a great overview of what compliance tasks are coming due."

- Senior Sustainability Engineer, Cornerstone Chemical
