

# Smarter EHS Inspections **Built** for Frontline Teams

Standardize your inspection program with OSHA and EPA-aligned checklists, mobile-ready templates, and real-time tracking.

## Trusted by Safety-Driven Organizations Worldwide

## The Challenge: **Inconsistency** Creates Safety and Compliance Gaps.

### What You're Up Against

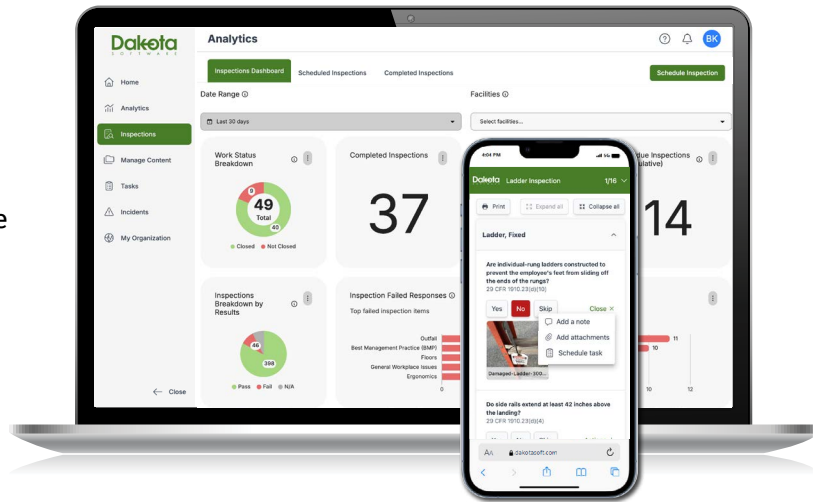

-  Checklists built without regulatory input create uncertainty around compliance requirements
-  Siloed programs make it difficult to capture issues consistently across sites
-  Manual or paper-based processes slow follow-up and reduce visibility
-  No easy way to confirm inspections are completed and issues are resolved

### How Dakota Helps

-  Preloaded OSHA and EPA-aligned questions help ensure a strong compliance foundation
-  Flexible templates with standardized questions normalize responses and results
-  Mobile-friendly workflows allow inspections and tasks to be completed on the spot
-  Interactive dashboards track completion, surface trends, and flag recurring issues

# A Smarter Path to Effective EHS Inspections

- 1 Create and Share Checklists**  
Start with preloaded EHS-aligned questions or add your own, build templates using the drag-and-drop editor, and share them across your sites.
- 2 Conduct Inspections and Capture Issues**  
Assign inspections to team members, then capture findings with flexible response types, uploaded photos, and notes from any connected device.
- 3 Monitor Performance and Drive Action**  
Track corrective actions to closure, and measure inspection completion, failure rates by item type, and issues across every location and zone.

## Key Benefits of Dakota's EHS Inspection Solutions

### Mobile-Friendly Workflows

Conduct inspections and complete tasks from any connected device.

### Regulatory-Ready Checklists

A library of 500+ OSHA and EPA-aligned questions with referenced citations.

### Drag-and-drop Template Builder

Create and share checklist templates with linked items and flexible response types.

### Segment with Zones

Organize facilities or campuses into manageable sections for more granular tracking and analysis.

### Integrated Corrective Action Tracking

Assign and track corrective actions for accountability across the enterprise.

### Centralized Oversight

Monitor progress and measure performance for all sites with real-time dashboards and email alerts.

## Who Uses Dakota's Inspection Solutions

### Corporate EHS Leaders

Standardize inspection programs across every site and gain visibility into trends and areas of risk.

### Site EHS Managers

Access ready-to-use checklists for safety and compliance then customize to fit your site's needs.

### Operations Managers

Ensure equipment and facilities are inspected regularly and issues are tracked to closure.

**Ready to see it in action?**

*"Dakota Inspections is a great tool for standardizing and tracking programs across facilities. The question library helped us get started quickly."*

- EHS Manager, Sunbelt Solomon
